DETAILED ACTION

This office action is responsive to amendment filed on 07/16/2003.

Response to Amendment

The examiner has acknowledged the submission of new claim 17.

Response to Arguments

Applicant's arguments, see amendment, filed on 07/16/2003, with respect to the rejection(s) of claim(s) 9 – 14, and 17 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Koopman, Jr. et al (US 5,952,937).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12 – 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Koopman et al (US 5952937; hereinafter Koopman, Jr.)

Art Unit: 2635

Regarding claim 12, Koopman, Jr. teaches an apparatus for controlling an electronic device (figure 1), which comprises at least one operating unit (62, figure 1; col. 3, lines 5 - 8), and a movable part (32, figure 1) on which is arranged the at least one operating unit and including (col. 2, lines 21 - 27) a transponder (col. 3, lines 11 – 26; see claim 1), and a code generator for generating a plurality of codes to be selected via the at least one operating unit in order to modulate an electromagnetic oscillating emitted from the transponder (col. 3, lines 54 – 65; paragraph bridging col. 3, line 66 through col. 4, line 9).

Regarding claim 13, Koopman, Jr. teaches an apparatus for controlling an electronic device, wherein the at least one operating unit includes a plurality of operating elements including a plurality of pushbuttons, and each code of the plurality of codes generated by the code generator is associated with a respective one of the plurality of operating elements (col. 3, lines 8 - 11).

Allowable Subject Matter

Claims 9 – 11, and 17 are allowed.

Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: As specifically claimed, the art of record fail to teach an apparatus for controlling an electronic device, which further comprises a control unit for limiting one of a production

Art Unit: 2635

and an emission of the transmitted modulated electromagnetic oscillation to a time necessary for a transfer of a selected one of the plurality of codes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hettich et al (US Patent Number 5,790,043) discloses a procedure for operating a locking system for lockable objects.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yves Dalencourt whose telephone number is (703) 308-8547. The examiner can normally be reached on M-TH 7:30AM - 6: 30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Horabik can be reached on (703) 305-4704. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
